

# DVClub considers Verification Methodology

DVClub, Bristol is going from strength to strength. The first two meetings had 50 and 60 attendees respectively, and we're aiming for better things with a GREAT line-up of speakers for the third event on Verification Methodology on April 22<sup>nd</sup> 2009, 11.30 – 2.00 at the University of the West of England, Frenchay Campus, Bristol.

- “*A very brief overview of current verification methodology standards (OVM, VMM and eRM), their status in the market, and future trends*”, Jonathan Bromley, Doulos, Ringwood
- “*Practical implications of adopting OVM / SV*”, Andrew Bond, Icera, Bristol
- “*Progressive migration from ‘e’ to SystemVerilog : A Case Study*”, Chris Brown, TI, Northampton
- “*The AVM and OVM in IP Core Verification - Experiences and Observations*”, Gareth Edwards, Xilinx, Edinburgh
- A panel discussion on Methodology

Plus the usual survey results from Mike Bartley, TVS.

Of course, there will be free food, drink and the chance to network with old friends and colleagues. **We will also be introducing a “reference library” and we will have some books to give away**☺.

For those who haven't heard of DVClub, the events run in 7 cities - from Austin to Bangalore. Every event involves one or more verification engineers describing recent experience. There is time to meet people in the business, a chance to catch up with old friends, and of course, free food and drink! If you're a verification engineer and would like to meet your fellow coworkers, discuss verification trends, speculate on chosen career paths, or just eat free food, then DVClub is for you.

Don't miss out – register now for this **free** event by emailing Mike Bartley (mike@tandvsolns.co.uk).

This event is sponsored by Doulos, UWE, NMI and TVS
